

THRESHOLDING
explores

Kambo Peptides

Phyllomedusins

Stimulate smooth muscle, increase secretions and blood circulation, aiding detoxification and promoting deep digestive balance.

Dermorphins & Deltorphins

Natural opioid peptides that deeply relax the nervous system and relieve pain.

Caeruleins & Sauvagines

Acts on pancreatic, pituitary, adrenal and smooth muscle function.

Tryptophilins

A diverse group of neuropeptides providing new perspectives on how to support cognitive function.

Dermorphins & Deltorphins

Natural opioid peptides that deeply relax the nervous system

Adenoregulins

Influences cell communication, especially in the brain, potentially supporting cognitive clarity.

Phyllokinins & Bradykinins

Expands blood vessels to increase permeability, helping peptide circulation and absorption.
